At the sittings of the District Court held at Youngstown last week there were forty-seven cases to be disposed of.

Dr. Lachner is in town again and will be here till Nov. 15th. Closing up an office in another town caused him to delay his return. In future he will be here as frequently.

Messrs. B. E. Kelly, manager, and G. A. Doyle, inspector, of the Bank of Toronto, are paying a business visit to Sibbald today.

Presidential Election Still Undecided

Both Sides Confident

New York, Nov. 7.—Reports at noon from practically all sections indicated that a heavy vote had been cast, and many points reported that the bulk of the voting had been cast before 10 a.m.

New Ashford, a small Massachusetts town, had the distinction of making the first returns. The town has twenty-three voters this year and when the polls closed at 10 a.m. the result of the count was: Hughes 16, Wilson 7.

New York State and other Atlantic states reported an unusually large early vote and similar reports came from the west and south. The fair weather which prevailed and the heavy early voting apparently pleasing news to those in charge at both Republican and Democratic national headquarters here, as both expressed gratification at the course of events.

New York, Nov. 8. With the country's choice of a president in the almost unprecedented status of doubt on the day after election, both Democratic and Republican headquarters were scenes of nervous activity and tension. Although both sides claim majorities in the electoral college, there is, nevertheless, to be a feeling at both places there was a chance that the determination of the final result, with so many states doubtful, might be prolonged perhaps for another day, and there was some unofficial talk that the decision might eventually be thrown in to the house of representatives.

There were suggestions also that there might be in some states bitter contests over the integrity of the returns which might be drawn out for several days with the result hinging on a recount.

Conservative Party Hold Annual Meeting

An annual meeting was held at Cereal on Friday of last week, in the interests of the Conservative party for the Audin constituency. The following officers were elected for the ensuing year: Mr. Aitkins, President; Mr. Bredin, Cereal, Secretary-Treasurer. Vice-Presidents, Mr. Gillespie, Oyen; Mr. Peers, Audin Valley; Mr. Bringslaw, Chiswick; and Mr. Cowan of Youngstown.

After the election of officers it was decided to hold a convention at Chiswick on Monday, Nov. 20 at 7.30 p.m., for the selection of candidates.

In the evening a public meeting was held when an enthusiastic gathering were present. Among those who spoke at the meeting were: Mr. Michener, the leader of the party, Mr. Handley of Okotoks, and Mr. Hillecks of Calgary.

Judging from the close attention and frequent applause given by the audience to the speakers, there is no doubt that the public are interested in the administration of this province, and a keen interest can be expected to be shown when the next election is held.

Wheat and the British Navy

Canadian wheat is worth about \$1.75 a bushel. In Russia it is worth about 50 cts a bushel. A very large part of the difference in price can be credited directly to the fact that the world markets are kept open for Canadians and Americans alike by the absolute supremacy of the British Navy. Even a partial success of the German Navy and the breaking away into the Atlantic of a half a dozen cruisers might have largely paralyzed shipping on the Atlantic.

Every day we realize more and more what the British Navy has meant to Canada and the Empire in this war. We did not begin to realize what the conflict meant for us till our own Canadians got in action and into the casualty lists.

We ought to have our own flesh and blood fighting for the Empire in the Navy just as in the army. Let us encourage recruiting for the Navy on the same outline. We can do so heartily for the men who join will get the same pay and allowances as those in the Canadian Army.—Saskatoon Star.

The Task Must Be Taken Up

In common with half the nations of the earth, we are losing the flower of our youth. Men who in forge or field or study would have played on the national stage, now concentrate all their service into a few brief months, and they are gone. As their company grows more numerous, and as it seems more honorable, every day, our senses are blunted to our loss, and death in the fullness and potency of life seems to be almost a natural consummation. Yet we know that it is not so, and that if the race is to go forward, others must take up the task which the dead, to fulfill a more insistent purpose, have laid down. The task is still there to be taken up, the broken promise is waiting to be fulfilled.—London Times.

"Regarding the quality of the water in the wells, while it is admitted that the quality of the water is not found in some parts, being generally poor, scarcely a case is recorded of well water being unfit for domestic consumption. The water, however, is often hard, but it is always usable."

"The Boy Scouts of Canada are to find water almost anywhere at no great price; in other words, it is not a difficult matter to decide on."

"Some very responsible call for more information as to the life in the time honored methods of the Boy Scouts of Canada. They sink their well where they want the water, and it is uncessary try again."

"The Boy Scouts of Canada are struck within twenty feet of a dry hole of equal depth."

"One and all, we will grow up to be good citizens of this great country of Canada."

"An interesting figure in the snapshot photographs of the recent exhibition of the British Sovereign and King Albert of Belgium, Prince Charles, the youngest son of the Belgian Monarch, in Boy Scout's uniform."

The Boy Scouts of Belgium figured prominently in the exhibition, which told of the German invaders' devastating march through Belgium, and the courage and self-sacrifice of the Belgian youth. The exhibition was so full of interest that it was not even acknowledged that the Boy Scouts of Belgium were a part of the organization and it may be safely conjectured that the conclusion of the exhibition was the beginning of the revival of the Boy Scout movement in Belgium.

A One Man Tractor

The most powerful 3 Plow Tractor in the world. The Bates Steel Mule is the most powerful Tractor in the world of the three plow class.

With a draw bar pull on its plowing speed of over 3,200 lbs. it gives a reserve power to draw on which will pull its three plows through almost any kind of soil, at a good speed.

When this power is compared to the 1920 lbs to 2,000 lbs., that three plow tractors usually have at their plowing speed, it can readily be appreciated by comparison that the Bates Steel Mule not only is the most powerful three plow tractor in the world, but is so with a large margin to spare. And furthermore because of it transmitting its power through the ground to its draw bar by means of a "Crawler" instead of a wheel. This big power is available in the Spring when the soil is molten, and where under the same conditions the pull of a wheel tractor might drop to less than 500 pounds.

The "Crawler," together with the Compound Lever Hitch, makes the Bates Steel Mule just as powerful a puller in the Spring when the ground is molten and soft, as in the Fall when the footing is dry and hard.

It does everything that horses do, and does it better, quicker and cheaper. It burns kerosene or gasoline. For full particulars write or see—

OilPull Means This

FUEL at one-half the price means
lower operating costs, smaller upkeep
expenses and bigger profits.

Bear in mind that the OilPull is the only tractor that will successfully burn kerosene and cheaper oil fuels at all loads, under all conditions—all the time.

The OilPull, through deep plowing and thorough soil working, is increasing crops for a great many Dixie owners—in some cases doubling them. Burning kerosene, the OilPull adds this increase to your bank account at the lower possible cost.

A more dependable tractor than the OilPull can't be bought and you will find it able to take care of all your power jobs, whether draw-bar or belt. Two sizes, 15-30 and 30-50 horsepower.
